

Programming for Data Science Lab (MACSE502)

CAT-1 Lecture Materials & Syllabus Details

Module	Lecture	Topic
I	1-2	Condition and Branching Statements, Built- in data structures: List, Tuple, Dictionary, Set,
I	3	User defined data structures: Stack
I	4-5	User defined data structures: Queue, Priority Queue
I	6-7	String handling methods, Exception Handling, Object-Oriented Concepts
I	8-9	APIs , Data Collection and NLP
II	10	Pandas-Series, DataFrame, Filtering Data in DataFrame, Data Extraction
II	11	Handling Missing Values, Built-in functions, Data Operations
II	12	Data Preprocessing with Pandas
II	13	Merging-DataFrames-Data-Mining-Scrapy-and-Beautiful-Soup
II	14	Data Processing and Modelling_NumPy - SciPy(Pending)
II	15	Creating-and-Manipulating-Arrays-Using-NumPy
II	16	Feature Engineering and Exploratory Data Analysis
II	17	Data Processing and Modelling_Pandas, Scikit-Learn

Question Paper Pattern & Format

Syllabus:

Module-1 & Module-2

Question paper pattern

5 x 10 marks=50 marks

Each question may have 2 parts

Part-A : 4marks Descriptive

Part-B: 6 Marks (Higher Order Thinking(HoT))

Module-1: 3 x10=30 Marks

Module-2: 2 x 10 =20 Marks

~15-20 marks: Descriptive

~30-35 Marks: HoT
